

# **BENEFITS AND FEATURES OF THE QUANTUM PAD**

Quantum Pads are meant to be placed over the Biomat to add one more dimension to the negative ion and infrared therapies the Biomat provides. Quantum Pads are made of eighteen layers. These 18 special substances develop strong negative electricity and so they play a role in returning the voltage in the body's cell membrane to normalcy.

Once the voltage in a cell becomes normal, the cell instantly begins detoxification while a nerve cell stops the delivery of pain signals, alleviating pain in the human body. These 18 kinds of special substances are organic compounds made from plant seeds which produce strong far infrared light.

## **The Quantum Pad's Quantum Energy Layer with Far Infrared Rays (FIR) and Tourmaline Layer with Negative Ions**

Both the quantum energy layer and the tourmaline layer maintain your health by improving blood circulation through the use of far infrared rays that enhance resistance against viruses and bacteria. It performs improvement to the immune system with the creation of negative ions.

### **Stability of the Brain**

Quantum Pad reduces Beta waves, created by highly stressful situations, while increasing Alpha waves, which create a relaxed state, allowing deep sleep and more energy. This is healthy for everyone, but especially for those who need a high level of focus

### **Antibiotic Benefit**

The quantum energy layer reduces formaldehyde and ammonia, which are harmful gases, and helps in cases of pneumonia and staphylococcus. The quantum pad's antibiotic function eradicates these gases by 99.9%

### **Heat Support Hypoallergenic**

The Quantum Pad's, hypoallergenic microfiber fabric prevents heat loss, keeping you healthy and free from allergic dyes found in most man-made fabrics.

### **Durability Air Permeability**

Its high density and durable 3D mesh material allows excellent air permeability. It also aids the passage of far infrared rays when used with the Biomat. The microfiber cover is machine washable and light, making it easy to wash. The 3D mesh distributes your body weight and pressure points are eliminated.
